22307 South Military  
Dearborn, Michigan

TO: The Libraries of the State of Michigan

FROM: Floyd L. Haight, Chairman, Michigan Civil War Centennial Observance Commission

DATE: January 20, 1961

SUBJECT: Michigan Civil War Regiments and the Battles in Which They Participated

Enclosed are two lists that should be of use to you in the approaching centennial anniversary of Civil War battles.

The first is a list of regiments raised in Michigan from companies formed in particular towns. Such local units were used up after the first year of the war, and thereafter regiments and companies were raised by enrolling men as individuals from various parts of the state. At the same time, a dozen boys from the same community might well enlist together in the same company. But as far as this listing goes, it serves to show that certain towns were represented in certain regiments, and if your town is designated, your citizens may be interested in following the engagements of that company according to the battles of the regiment concerned.

If your town is not represented in this list, you, or some local historian, should be able to find you in which Michigan regiments a number of your local boys served.

The second list is a chronological list of battles in which Michigan regiments fought, and the identifying numbers of those regiments.

These lists are presented to the Libraries of Michigan as a free service of the state's Civil War Centennial Commission. The material was compiled by Dr. Howard Peckham of the Clements Library, University of Michigan, Chairman of the Michigan Civil War Centennial Observance Commission's Program Committee, with William Haight of Michigan State University collaborating.

The State Commission has nearly thirty committees working on various phases of the Impact of the Civil War on Michigan.

If your Library publishes any articles concerning the Civil War, or the Centennial Observance, I would appreciate receiving a copy of the article. Our Michigan Commission is compiling all such records, along with what valuable material from the Civil War period which we can resurrect.

We hope, by this means, to provide posterity with a greater understanding of the immense reserves of bravery, sacrifice, and idealism which is embedded in the American character.

President Eisenhower has issued a proclamation proclaiming January 8 as the day for the beginning of the National Civil War Centennial Commemoration throughout the Nation. Governor Swainson is planning to do the same for our State of Michigan.

Your mayor has been sent a letter by our Commission suggesting that he appoint a Civil War Centennial Commission for your city. It would be this Commission's job to help locate any old letters, diaries, papers pictures etc. They also could develop the stories of the men of your community who served during the Civil War. You might call your mayor to see if he has appointed such a commission and who is its chairman.

This city Commission could be of immense help to your Library or to your Historical Society if you should have one.

- |                |             |
|----------------|-------------|
| A - Cassopolis | F - Niles   |
| B - Benton     | G - Lansing |
| C - Buchanan   | H - Lawton  |
| D - Albion     | I - Berrien |
| E - Niles      | K - Niles   |

Chronological List of  
Battles of the Civil War,  
Showing the Particular Michigan Units  
Involved.

The infantry regiments are listed by plain numerals.  
Numbers followed by the letter "C" are cavalry regiments.  
Numbers followed by a letter and the abbreviation "Bat." refer to  
artillery batteries.

SS designates the 1st Sharp Shooters.  
E & M designates an Engineers and Mechanics unit.  
Merrill Horse was a special cavalry unit.

July 1861

- 11 - Rich Mountain, W. Va. - 1 "A" Bat.
- 18 - Blackburn's Ford, Va. - 2d, 3rd
- 21 - Bull Run, Va. - 1st, 2d, 3d, 4th

September 1861

- 11-12 Elkwater, W. Va. - 1 "A" bat.

October 1861

- 3 - Green Briar, W. Va. - 1 "A" Bat.
- 21 - Ball's Bluff - 7th

November 1861

- 7 - Port Royal, S. C. - 8th

December 1861

- 18 - Coosaw, S. C. - 8th

January 1862

- 1 - Coosaw River - 8th
- Port Royal Ferry - 8th
- 9 - Pohick Church - 5th
- 19th - Mill Springs, Ky - E & M

February 1862

- 14 - Bowling Green, Ky. - 1 "A" Bat.

Morrisville, - 4th  
Nashville Pike, Tenn. - 4C
- 31 - Stone River - 9th, 10th, 11th, 13th, 21st, 4C, 1"A" Bat.

1. The first part of the paper is devoted to a study of the properties of the function  $f(x)$  defined by the equation  $f(x) = \int_0^x f(t) dt$ . It is shown that  $f(x)$  is a constant function, and its value is determined by the initial condition  $f(0) = 1$ .

2. In the second part, we consider the problem of finding the maximum value of the function  $f(x)$  on the interval  $[0, 1]$ . It is shown that the maximum value is attained at  $x = 0$  and is equal to 1.

3. The third part of the paper is devoted to a study of the properties of the function  $f(x)$  defined by the equation  $f(x) = \int_0^x f(t) dt$ . It is shown that  $f(x)$  is a constant function, and its value is determined by the initial condition  $f(0) = 1$ .

4. In the fourth part, we consider the problem of finding the maximum value of the function  $f(x)$  on the interval  $[0, 1]$ . It is shown that the maximum value is attained at  $x = 0$  and is equal to 1.

5. The fifth part of the paper is devoted to a study of the properties of the function  $f(x)$  defined by the equation  $f(x) = \int_0^x f(t) dt$ . It is shown that  $f(x)$  is a constant function, and its value is determined by the initial condition  $f(0) = 1$ .

1. The first part of the paper is devoted to the study of the properties of the function  $f(x)$  defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

It is shown that the function  $f(x)$  is continuous and differentiable on the interval  $(-\infty, \infty)$ . The derivative of the function is given by the formula

$$f'(x) = \frac{1}{1+x^2}$$

It is also shown that the function  $f(x)$  is bounded on the interval  $(-\infty, \infty)$ . The maximum and minimum values of the function are given by the formulas

$$\max_{x \in (-\infty, \infty)} f(x) = \frac{\pi}{2}$$
$$\min_{x \in (-\infty, \infty)} f(x) = -\frac{\pi}{2}$$

2. The second part of the paper is devoted to the study of the properties of the function  $g(x)$  defined by the equation

$$g(x) = \int_0^x \frac{1}{1+t^4} dt$$

It is shown that the function  $g(x)$  is continuous and differentiable on the interval  $(-\infty, \infty)$ . The derivative of the function is given by the formula

$$g'(x) = \frac{1}{1+x^4}$$

It is also shown that the function  $g(x)$  is bounded on the interval  $(-\infty, \infty)$ . The maximum and minimum values of the function are given by the formulas

$$\max_{x \in (-\infty, \infty)} g(x) = \frac{\pi}{4}$$
$$\min_{x \in (-\infty, \infty)} g(x) = -\frac{\pi}{4}$$

3. The third part of the paper is devoted to the study of the properties of the function  $h(x)$  defined by the equation

$$h(x) = \int_0^x \frac{1}{1+t^6} dt$$

It is shown that the function  $h(x)$  is continuous and differentiable on the interval  $(-\infty, \infty)$ . The derivative of the function is given by the formula

$$h'(x) = \frac{1}{1+x^6}$$

It is also shown that the function  $h(x)$  is bounded on the interval  $(-\infty, \infty)$ . The maximum and minimum values of the function are given by the formulas

$$\max_{x \in (-\infty, \infty)} h(x) = \frac{\pi}{6}$$
$$\min_{x \in (-\infty, \infty)} h(x) = -\frac{\pi}{6}$$

4. The fourth part of the paper is devoted to the study of the properties of the function  $k(x)$  defined by the equation

$$k(x) = \int_0^x \frac{1}{1+t^8} dt$$

It is shown that the function  $k(x)$  is continuous and differentiable on the interval  $(-\infty, \infty)$ . The derivative of the function is given by the formula

$$k'(x) = \frac{1}{1+x^8}$$

It is also shown that the function  $k(x)$  is bounded on the interval  $(-\infty, \infty)$ . The maximum and minimum values of the function are given by the formulas

$$\max_{x \in (-\infty, \infty)} k(x) = \frac{\pi}{8}$$
$$\min_{x \in (-\infty, \infty)} k(x) = -\frac{\pi}{8}$$

5. Conclusion

The results of the study show that the functions  $f(x)$ ,  $g(x)$ ,  $h(x)$ , and  $k(x)$  are continuous and differentiable on the interval  $(-\infty, \infty)$ . The derivatives of the functions are given by the formulas

$$f'(x) = \frac{1}{1+x^2}$$
$$g'(x) = \frac{1}{1+x^4}$$
$$h'(x) = \frac{1}{1+x^6}$$
$$k'(x) = \frac{1}{1+x^8}$$

The maximum and minimum values of the functions are given by the formulas

$$\max_{x \in (-\infty, \infty)} f(x) = \frac{\pi}{2}$$
$$\min_{x \in (-\infty, \infty)} f(x) = -\frac{\pi}{2}$$
$$\max_{x \in (-\infty, \infty)} g(x) = \frac{\pi}{4}$$
$$\min_{x \in (-\infty, \infty)} g(x) = -\frac{\pi}{4}$$
$$\max_{x \in (-\infty, \infty)} h(x) = \frac{\pi}{6}$$
$$\min_{x \in (-\infty, \infty)} h(x) = -\frac{\pi}{6}$$
$$\max_{x \in (-\infty, \infty)} k(x) = \frac{\pi}{8}$$
$$\min_{x \in (-\infty, \infty)} k(x) = -\frac{\pi}{8}$$

The results of the study show that the functions  $f(x)$ ,  $g(x)$ ,  $h(x)$ , and  $k(x)$  are continuous and differentiable on the interval  $(-\infty, \infty)$ . The derivatives of the functions are given by the formulas

$$f'(x) = \frac{1}{1+x^2}$$
$$g'(x) = \frac{1}{1+x^4}$$
$$h'(x) = \frac{1}{1+x^6}$$
$$k'(x) = \frac{1}{1+x^8}$$

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the problem and the objectives of the research. It also mentions the scope of the study and the methods used.

2. The second part of the report is a detailed description of the experimental work. It includes a description of the apparatus used, the procedure followed, and the results obtained. It also discusses the errors and limitations of the experiment.

3. The third part of the report is a discussion of the results. It compares the results with the theoretical predictions and with the results of other experiments. It also discusses the implications of the results and the conclusions drawn from the study.

4. The fourth part of the report is a summary of the work. It briefly reviews the main points of the report and states the conclusions. It also mentions the acknowledgments and the references.

5. The fifth part of the report is a list of references. It includes the names of the authors, the titles of the papers, and the names of the journals or books in which the papers were published.

6. The sixth part of the report is a list of figures. It includes the numbers of the figures and the titles of the figures. It also includes the captions of the figures.

7. The seventh part of the report is a list of tables. It includes the numbers of the tables and the titles of the tables. It also includes the captions of the tables.
